Interest over time ?

Welcome to Zeppelin!

Zeppelin is web-based notebook that enables interactive data analytics. You can make beautiful data-driven, interactive, collaborative document with SQL, code and even more!

Notebook

- Import note
- Create new note

- Zeppelin Tutorial
- Cron
- Flowcharts
- Language Fun
- Playing with Pandas
- Query Solr

Community

Please feel free to help us to improve Zeppelin, Any contribution are welcome!

- Mailing list
- Issues tracking
- Github

Try it out today at:

<http://zeppelin.dev.o19s.com:8080>

Let's Jump In

- Let's do the Spark hello world
- Look at multiple coding languages
- Let's play with Pandas and SQL (for the Data Scientists)!
- Cron lets you automate some analytics processes..
- Source Revision
- Using the Solr interpreter
- Search Analytics Demo

Recap

1. Zeppelin is meant for teams sharing ideas - **If it's just you, may be too heavy!**
2. Most interesting in a multiple language/multi data sorcery environment.
3. **Upcoming 0.9.0 release is big!** Clustering, Helium package management, and much more.
